Women in Assurance Program

Empowering Women in the Future of Assurance

At PM Solutions, we are proud to lead a *transformative initiative*: the **Women in Assurance Program**. Designed to advance diversity, equity, and inclusion across the assurance sector, this program reflects our commitment to creating meaningful opportunities for women to thrive as assurance professionals and leaders.

The Women in Assurance Program is **not just a diversity initiative**, it is a bold commitment to empowering women to shape the future of assurance. At PM Solutions, we are proud to support women in building rewarding, influential, and purpose-driven careers.

Program Vision

The Women in Assurance Program is a forward-looking initiative that recognises the importance of representation and inclusion in assurance. It is a strategic effort to build a more diverse and capable assurance workforce, one where women are supported, empowered, and celebrated.

Program Objectives

Promoting diversity: We are committed to increasing the visibility and participation of women in assurance reviews. By championing diversity, we enrich the perspectives, quality, and depth of our assessments.

Skill development: Through tailored training, mentorship, and professional development pathways, the program equips participants with the knowledge and confidence to excel. We provide a supportive platform for continuous learning and career progression.

Leadership opportunities: PM Solutions is focused on identifying and cultivating leadership talent. The program encourages women to take on key roles in assurance reviews and provides the support needed to lead with impact.

Building a professional community: We are fostering a connected and collaborative community. Through regular events, forums, and networking opportunities, participants can share experiences, exchange knowledge, and build lasting professional relationships.

Why Women in Assurance Matters

Strengthening the Profession Through Inclusion

At PM Solutions, we believe that empowering women in assurance strengthens the entire profession. Through diversity, we unlock innovation, deepen insight, and build more effective assurance outcomes. The **Women in Assurance Program** is designed to inspire, support, and elevate women as valued contributors and leaders in assurance reviewing.

Empowering Careers

The Program serves as a launchpad for women to pursue rewarding careers in assurance. With targeted training, mentorship, and support, we aim to break down barriers and foster the confidence and capability needed to succeed and lead in this specialised field.

Building a Diversified Workforce

By encouraging more women to enter the assurance profession, we diversify the talent pool and challenge *outdated stereotypes*. The **Women in Assurance Program** creates an environment where women are not only welcomed, but recognised for their unique insights and contributions to high-quality assurance reviews.

Enhancing Decision-Making Through Diversity

Inclusive teams lead to better outcomes. When women are represented in assurance reviews, decision-making is enriched with broader perspectives and greater balance. This diversity drives stronger, more accountable results, for organisations and for the public they serve.

Career Growth and Leadership Pathways

The Program is committed to ensuring women have clear and supported pathways to career advancement. From early-career reviewers to emerging leaders, we provide opportunities to grow, lead, and shape the future of assurance in both the public and private sectors.

Driving Broader Industry and Government Impact

Empowering women in assurance has a ripple effect. As more women thrive in this space, industry and government benefit from a richer spectrum of skills, experiences, and thinking. The **Women in Assurance Program** is a catalyst not only for individual success, but for meaningful, system-wide change in assurance delivery.

How to get Involved

Be Part of the Movement for Change in Assurance

Whether you're an experienced assurance professional or exploring the field for the first time, the **Women in Assurance Program** invites your participation.

Take part in our skill-building workshops, connect with mentors, and join a growing community dedicated to championing gender equity across the assurance profession.

This is more than a Program - it's a platform for progress. By getting involved, you're contributing to a more inclusive, innovative, and impactful future for assurance reviews.

Together, we can elevate the profession and ensure that diversity is at the core of excellence.
